Class Description

Focusing on the latest code changes, this class explains lighting requirements for new and remodeled residential spaces. Topics also include Pacific Gas and Electric Company (PG&E) lighting rebates and emerging technologies such as LEDs. This intermediate class is for professionals who design, specify, and/or inspect lighting installations in new and remodeled homes. Participants should already have general knowledge of the residential lighting code. The class qualifies for 5.5 AIA (HSW) CEU credits.

Following is a representative selection of concepts to be covered:

- Introduction
- Title 24 Background
- Introduction of common terms and emerging technologies
- New in 2008 Title 24 lighting requirements
- Design examples and product discussion
- Q&A & Wrap-Up
- Class adjourns

Instructor Information

Kelly Cunningham is the outreach director at California Lighting Technology Center (CLTC). She is responsible for the marketing and outreach components of CLTC's research and technology demonstration projects, and she leads many of the Center's efforts to deploy new, energy-saving lighting technologies into the broader market. Ms. Cunningham also co-designs and teaches education and training programs on lighting technologies and topics related to design. She frequently leads informational tours of the Center for industry affiliates, legislative partners, utility representatives, researchers and student groups and the public. She oversees the creation of CLTC's online and print publications, authors abstract proposals and articles, and co-writes grant proposals.

Complimentary continental breakfast and lunch will be provided.

This program is funded by California utility customers and administered by Pacific Gas and Electric Company, under the auspices of the California Public Utilities Commission.

"PG&E" refers to Pacific Gas and Electric Company, a subsidiary of PG&E Corporation.
